◆ Artificial Grass

ARTIFICIAL GRASS NEVER LOOKED AND FELT MORE NATURAL

Our aim is to make our artificial lawn look and feel as nice and soft as natural grass. Artificial grass provides a creative way to build more green spaces around you. It can be used for landscaping in offices, balconies, terraces, gardens, hotels, etc. The key features of Artificial grass lies in its life span and safety features. Asante grass uses best raw material with strong UV stability to make sure the grass keeps fresh and green over years. Our grass is delivered with a 6-year warranty against discoloration and UV degradation of the yarns against high intensity of the sun.

BENEFITS OF LANDSCAPE ARTIFICIAL GRASS

- Low maintenance.
- No watering.
- Cost effective.
- Environment friendly.
- Lead & heavy metal free.
- Shorter construction period.

◆ Eva Matt

Avail EVA Mats from us as per your requirements at a discounted price. We use high-density Eva foam with soft core in the middle in the production of superior quality Mats. So Whats Engineered Wood Made of?

Range of Finishes

Lacquered, Oiled, Brushed and Lacquered,
Brushed and Oiled, Handscraped and Unfinished.

4 - Sided V-Groove

A 4 - sided bevel brings definition
on plank edge for a classic
wood floor appearance

Rustic Grade

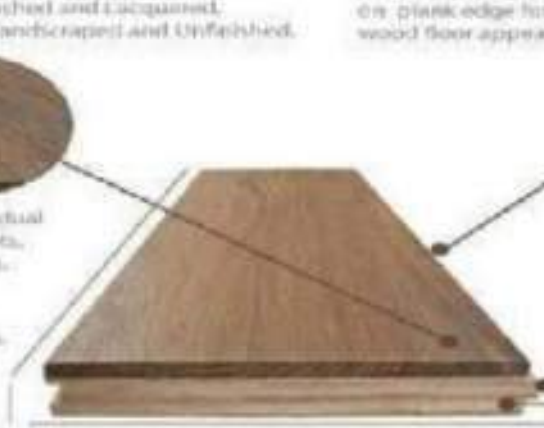

Each plank will have individual
characteristics such as knots,
grains and colour variation.

Board Lengths

Ranges to full length planks.

Thickness

14mm - 20mm.

Profiling

We sell both Click profiling,
and Tongue and Groove
profiling.

Board Width 120mm - 240mm. If you have a average
sized rooms we recommend going for a mid width plank.

Three Core Ply

3 ply commonly known as
multiply. This is to give the board
greater stability from the stresses
of expansion and contraction.

Laminate Floors

Laminate flooring allows you to enjoy a wood-like floor without the actual use of any solid wood in its construction, allowing it to be more environment-friendly.

It is made up of 4 primary layers bonded together under high pressure. A moisture resistant layer under a layer of HDF (high density fiber board) ensures better life for of products. This is topped with a high resolution photographic image of natural wood flooring. It is then finished with an extremely hard, clear coating made from special resin-coated cellulose to protect the laminate floor.

It is perfect for anyone wanting a durable floor for a fraction of the price and installation time of a hardwood floor, but with the attractiveness of real hardwood. Laminate wood floors are easy to maintain as it doesn't require any waxes, polishes, detergents or abrasive cleaner.

Solid Wood Floors

Solid wood floor represents a homogeneous construction of wood. The product expands 30% more than engineered wood and therefore it is seasoned well to allow for such expansion. Solid wood flooring comes with seven coats of formaldehyde-free acrylic lacquer which is uv-cured so that the product does not get dusty. Having unique features such as stain and scratch resistance, solid wood floors provides natural warmth. Easy to maintain and clean, this type of flooring comes with feather touch that provides comfort of bare foot walking.

Outdoor Deck Wood

The elegance and inimitable warmth of natural wood is combined with the convenience and durability guaranteed by our exclusive technology. Outdoor flooring are made up of a combination of bamboo fibre, high-density polyethylene and chemical additives, making them 100% recyclable and eco-friendly. The product is available in two varieties, in a wide range of sizes and has been designed to meet all your needs. The brushed surface provides excellent slip resistance making it suitable around swimming pools, gardens and can also be installed as composite deck flooring on the beach.

◆ PVC Vinyl Flooring

Vinyl flooring is a new type of resilient flooring in the market. Resilient flooring is simply artificial composite floors such as rubber, plastic, PVC, linoleum and the latest addition, Vinyl. They are produced massively in many parts of the world especially North America. Such synthetic flooring, which has been around for more than a century, act as a cost efficient substitute to natural floors such as wood, concrete, ceramic and marble.

Vinyl flooring, together with linoleum flooring are the first few Eco friendly resilient floorings in the market which is going to last for centuries to come. However today, high end resilient flooring (HERF) which is made up of 100% pure virgin vinyl pulp is taking over the conventional vinyl flooring with new technology and glueless installation system.

◆ PVC Panel

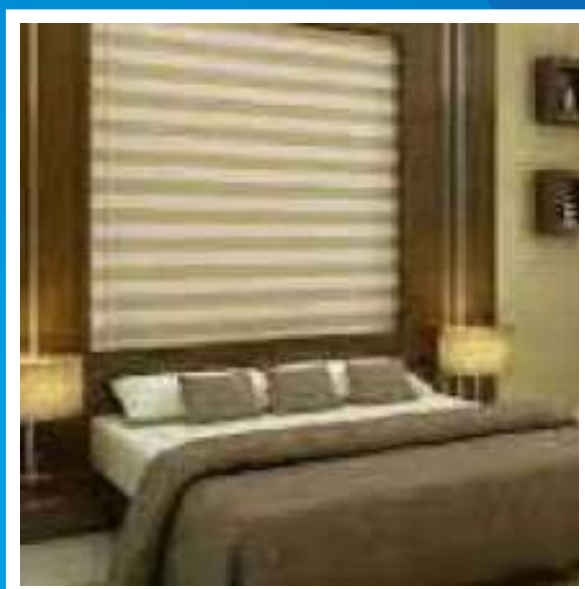

PVC paneling is mainly done to decorate and enhance the look of the interior and exterior designing of homes, offices, hospitals, hotels, etc.

ADVANTAGES OF PVC PANELS

PVC Panels are the easiest to install when it comes to the solutions in wall decoration. PVC panels are rigid and maintenance free regardless of the area of the surface. Just use a cloth to clean and you are done. These are cost effective when compared with tiles and wooden material and can be installed in almost half of the cost. PVC Panels also save the user from all the noise and clutter of cement and sand which comes with fitment of tiles etc.

FEATURES OF PVC PANEL

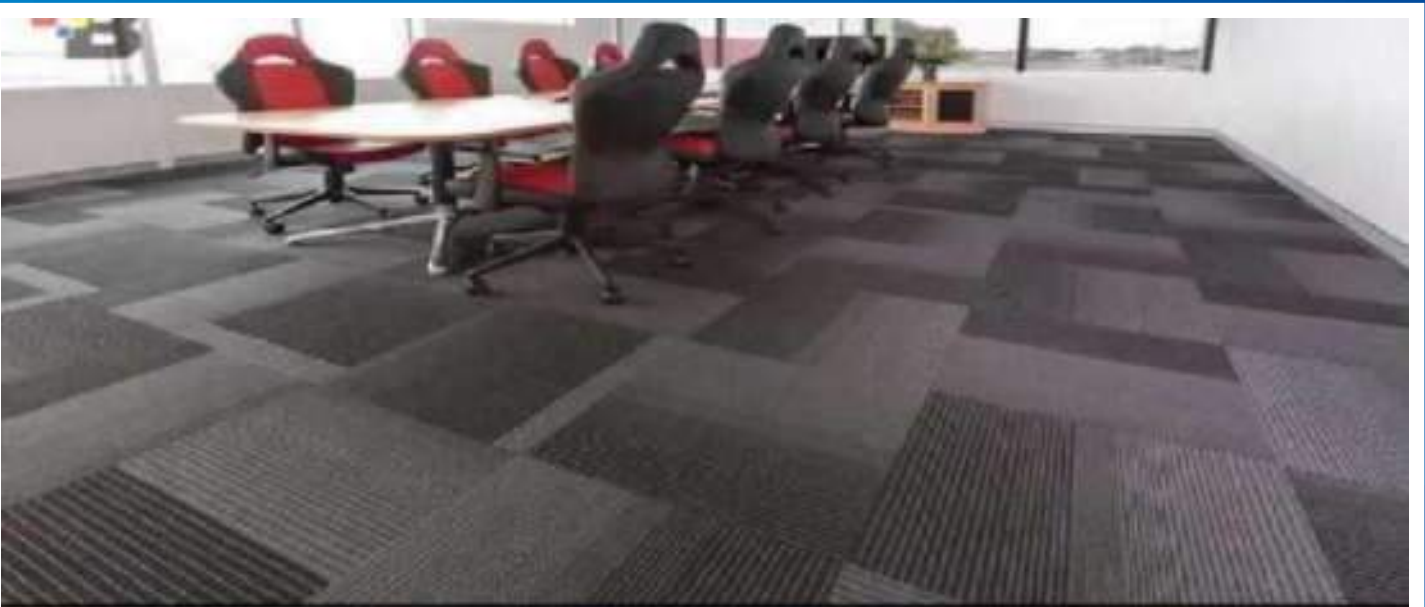

- Water proof
- Heat proof
- Damp proof
- Rust proof
- Rot proof
- Fire retardant
- Easy to maintain
- Sound Resistant
- Impact Resistant
- Light in weight
- Saves a lot of time
- Very economical
- Easy to cut, drill, nail and saw

◆ Carpet Flooring

Carpet Floor is a soft floor covering made of bound carpet fibers or stapled fibers, typically consisting of an upper layer of pile attached to a backing. Carpeting refers to wall-to-wall coverage, which is typically used indoors and can be used in both high and low traffic areas, it typically lasts for 15-18 years before it needs to be replaced. It offers the right balance of safety, comfort, performance and aesthetic pleasure.

They are a modern and stylish alternative to carpet rolls and are popular for complex room layouts. Easy as a DIY (do it yourself) to install, maintain or remove on your own without professional help. They are a durable, attractive and flexible flooring option with a multitude of mix and match colours, designs and patterns.
